

Redux

↳ State management lib.

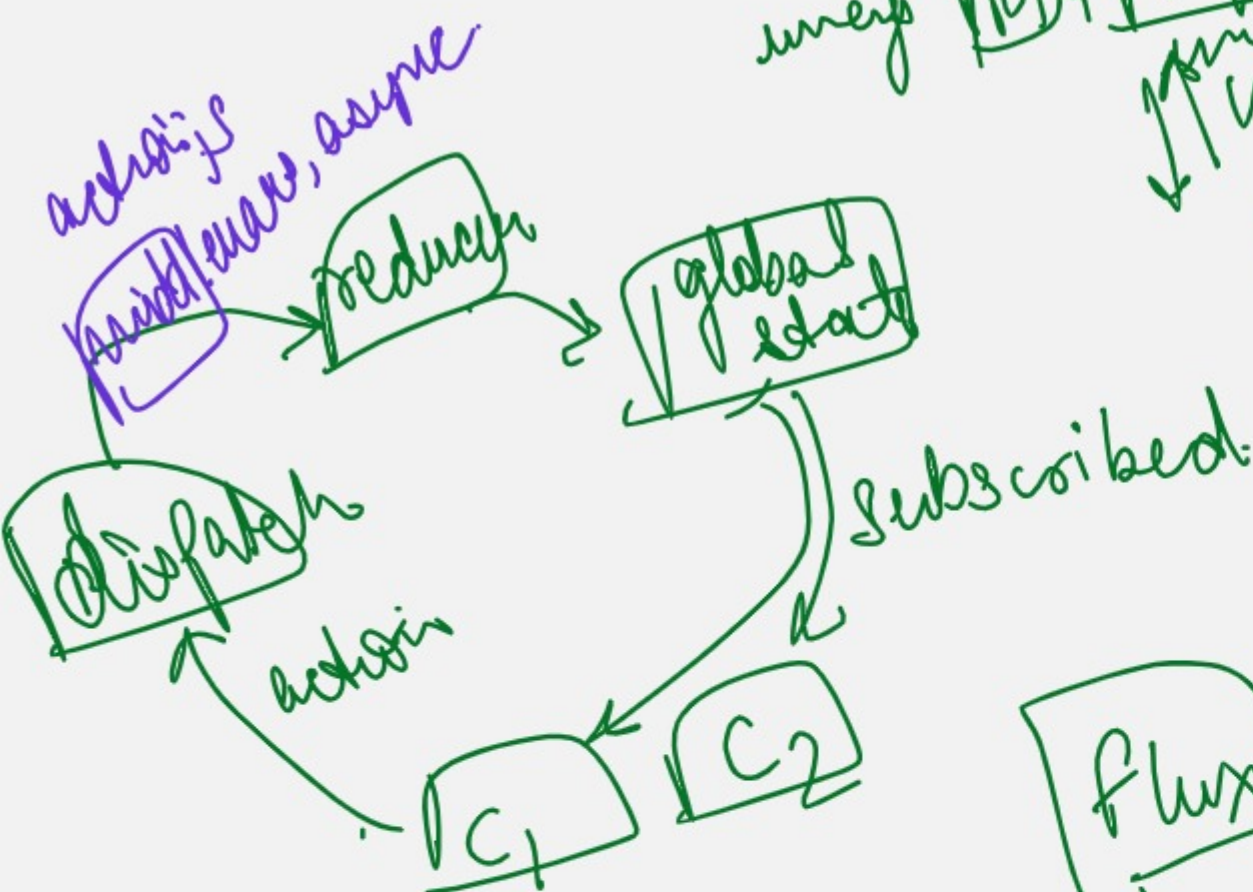

- multiple {
 - store
- actions → object [value, type]
- action creator → function → access to global state & updates
- reducers → methods
- store
- central state

Flow

↳ Flux pattern.

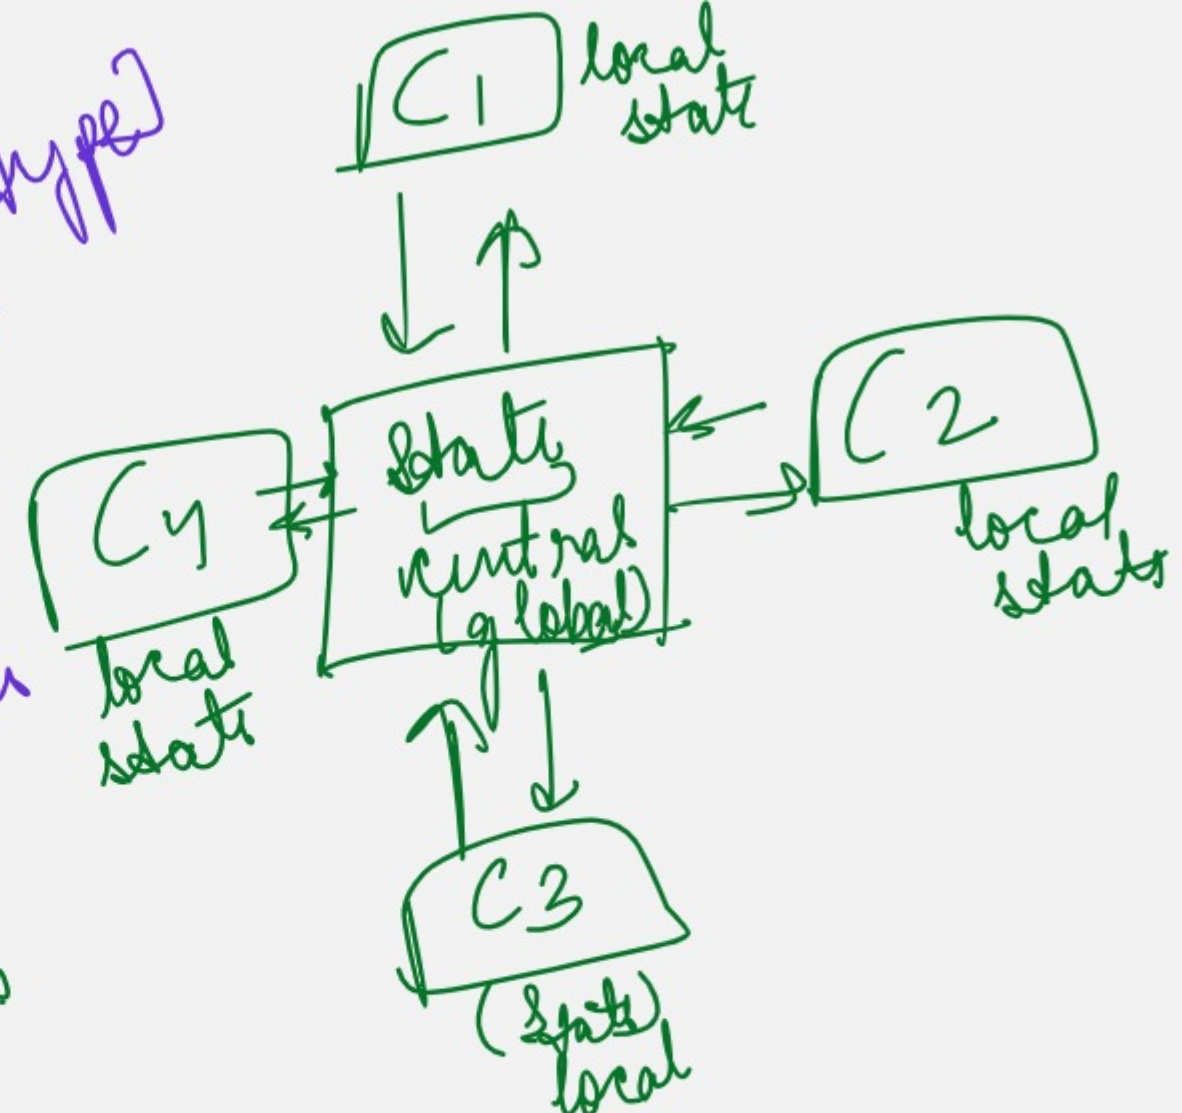

↳ npm install redux react-redux

updates → dispatch → reducers
↓
components

access → reducer → components

- ↳ Setup Boilerplate
- ↳ how to access this state
- ↳ how to update
- ↳ async logic → (thunk) / saga (middleware)
